

MEENAL BHARSAKLE

ABOUT ME

Passionate and hardworking college student working towards B tech in computer science in Vishwakarma Institute of Technology Pune. Eager to learn new technologies seeking internship opportunities to enhance my skills .

PROJECTS

Covid-19 Data analysis and Covid-19 predictor

- Analysed the data of past Covid-19 cases and presented them in graphical format using python
- Made a machine learning model to check the probability of a person having covid-19 using a machine learning algorithm called logistic regression
- Deployed the graphs and machine model on a website using flask

NutriCal

- Made a machine learning model to predict the food item uploaded by the user and calculate the calories and other nutrient present in the food item using convolutional neural networks .
- Made a fully functional website and deployed the machine learning model on it and added features like calorie counter and BMI calculator to the website .

Resume analysis using NLP

- Parsed the resumes uploaded by the user and displayed the important details of the persons resume
- Used Natural language processing to compare the resume of the user to the job descriptions of different companies and show the similarity between them web scrapped different job opportunities for the user to choose from after analysing his/her resume .Deployed the model on a webpage using flask

EDUCATION

VISHWAKARMA INSTITUTE OF TECHNOLOGY , PUNE

2022-present

B.TECH COMPUTER
SCIENCE ENGINEERING

KENDRIYA VIDYALAYA TRIMULGHERY SECUNDERABAD 2020-2021

HSC

percentage : 89

SKILLS

- Python , C , C++
- Web-development :
HTML , CSS , Java-script
- Flask , Node-Js
- logistic regression ,
CNN, Machine learning
- Natural language
processing
